Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000 is invested

| Example Investment: GBP 10,000 | If you cash in after 1 year | If you cash in after 5 years |
|--------------------------------|-----------------------------|------------------------------|
| Total costs | GBP 404 | GBP 1,136 |
| Annual cost impact(*) | 4.04% | 1.69% |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.45% before costs and 6.76% after costs.
