Definitions

1) TIC & TC are calculated on an annual basis but are subject to change subject to any market changes throughout the year which may impact the funds' future TIC. Higher TIC does not necessarily equate a lower return, nor does a lower TIC equate to a better return. The TIC may change, and as such the current TIC may not be an accurate indication of the future TIC.

2) The ongoing charges figure is estimated, based on the expected total of charges likely to be charged to the share class in the future. An estimate is being used as insufficient expense information is available as at the date of this document. The Fund's annual report for each financial year will include detail on the exact charges made. This figure excludes portfolio transaction costs (except for entry/exit charges paid when buying/selling shares in other schemes). This figure may vary from year to year.

3) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax.

4) Performance data is sourced from leading data providers, including Bloomberg and Morningstar, and is accurate as of the date of this document.
