Portfolio attributes

Investment objectives

The Sub-Fund aims to provide investors with long-term capital growth through active stock selection in global equity markets.The Sub-Fund aims to outperform global equity markets over the long-term, with an equivalent level of risk; the focus will be mid and large-cap companies across all geographies and sectors.

Investment policy

- The Sub-Fund will invest in equities and may hold other securities with equity characteristics.
- The Sub-Fund will be invested in a select group of approximately 30-50 global companies.
- The portfolio is actively managed and is not managed in reference to any benchmark, asset class restraints or a targeted return.

Fund related risks

- Due to fluctuations of the market, and performance of individual companies, equity risk can impact funds.
- Changes in currency exchange rates may have an impact on the value of the fund.
- While derivatives may be used to offset potential risk, there is no guarantee of them providing the anticipated protection.
- For full details of risks, please refer to the risk section in the Prospectus and KIID.

Definitions

1) Total Investment Charges (TIC) are the sum of the Ongoing Charges and the Transaction Costs (TC) and are expressed as a percentage of the total fund on an annual, rolling basis.

2) TC relate to the buying and selling costs for the underlying assets of the fund and are a necessary expense in the administration of the fund. Neither the TIC nor the TC should be considered in isolation as all returns may be impacted by other factors over time, including but not limited to market movements, fund type and the decisions of the Investment Manager(s).

3) TIC & TC are calculated on an annual basis but are subject to change subject to any market changes throughout the year which may impact the funds' future TIC. Higher TIC does not necessarily equate a lower return, nor does a lower TIC equate to a better return. The TIC may change, and as such the current TIC may not be an accurate indication of the future TIC.

4) The ongoing charges figure is estimated, based on the expected total of charges likely to be charged to the share class in the future. An estimate is being used as insufficient expense information is available as at the date of this document. The Fund's annual report for each financial year will include detail on the exact charges made. This figure excludes portfolio transaction costs (except for entry/exit charges paid when buying/selling shares in other schemes). This figure may vary from year to year.

5) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax.

6) Performance data is sourced from leading data providers, including Bloomberg and Morningstar, and is accurate as of the date of this document.
