

NEDGROUP INVESTMENTS BALANCED MULTIFUND CLASS A

January 2024

Marketing Communication

Nedgroup Investments MultiFunds Plc

SYNTHETIC RISK REWARD INDICATOR

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. For full details of risks, please refer to the risk section in the Prospectus and KIID

FUND OBJECTIVE

The Balanced MultiFund aims to provide moderate levels of growth with moderate levels of risk and volatility over the medium to longer-term.

The Sub-Fund is actively managed and is not managed in reference to any benchmark. It is managed by reference to a performance target which is to outperform USD 3M SOFR +1% to 3% over a minimum three years.

SUITABILITY & RISK AND REWARD

The Balanced MultiFund is suitable for clients with an investment time horizon of a minimum 3 years. Investing in the fund involves a risk to capital in order to achieve the desired return.

To achieve the investment objective, the portfolio invests across a range of asset classes within a strategic and tactical asset allocation framework designed to maximise diversification benefits. An absolute and relative valuation-based approach underpins this framework, resulting in a multilayered process to facilitate disciplined decision-making and risk management.

Portfolio construction combines exposures to active fund managers, who are expected to outperform their defined benchmarks and passive investment vehicles which provide low cost access to markets. This blend of active and passive funds is used to create a competitively priced investment solution.

Class A performance net of fees as of 31 January 2024. * Since inception annualised.

USD peer group is a 50/50 average of the Morningstar Moderate Allocation USD and Morningstar Cautious Allocation USD. The GBP is simulated performance based on the same competitor universe and returns are used as for the USD data, although a 65% hedge to sterling is applied net of fees, as per the fund's GBP share class. Past performance is not a guide to future returns.

For full details on fees and charges, please see the Prospectus and Supplement.

**Cash performance indicators calculated using USD and GBP LIBID 3 month figures to 31st January 2022. From 1st February transitioned to using 3mo SOFR for USD and 3mo SONIA for GBP.

1) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax. Data source Nedgroup Investments (IOM) Limited.

2) The on-going fee is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The on-going fee shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12-month period as at the date shown. The current on-going fee cannot be used as an indication of future on-going fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

KEY RISKS

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
