About the fund manager

Laurium Capital is an independently owned investment manager that was founded in 2008. The broad investment team is comprised of experienced analysts covering listed companies in South Africa and the Rest of Africa. This team utilises real-time communication technology to ensure continuous and robust debate. The South African equity strategy is a core part of the business and incorporates the teams experience of managing hedge fund strategies. Laurium has managed the SA Equity Fund since inception in 2014.

Investment philosophy

Identifying and taking advantage of economic cycles and market trends is an important component of the investment process.

The focus is predominantly on individual stock selection to create a concentrated portfolio.

Laurium systematically evaluate each share, utilising both absolute and relative valuation methodologies.

Macro-economic considerations are an essential overlay to portfolio construction and risk management.

Definitions

- 1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month. Data source: © Morningstar Inc. All rights reserved.
- 2) Total Expense Ratio (TER), expressed as a percentage of the Fund class, relates to expenses incurred in the administration of the Fund class. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund class, relate to the costs incurred in buying and selling the underlying assets of the Fund class. TC are a necessary cost in administering the Fund class and impact Fund class returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund class, relates to all investment costs of the Fund class. Both the TER and TC of the Fund class are calculated on an annualised basis, beginning 2021-02-22 and ending 2023-09-30. Where the Fund class is less than 3 years old, the TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available.
- 3) The Equity Index referred to under Risk measure is the FTSE/JSE All Share Index (ALSI).

► Disclaimer

Nedgroup Collective Investments (RF) Proprietary Limited is an authorised Collective Investment Scheme Manger and the representative of Nedgroup Investments Funds PLC in terms of the Collective Investment Schemes Control Act 45 of 2002. It is also a member of the Association of Savings & Investment South Africa (ASISA).
