About the fund manager

M&G Investments Southern Africa was established in 1994 and is 50% owned by the M&G plc group, one of Europe's largest active investment managers. Approximately 30% of the firm is owned by its South African employees. As active managers, they have a demonstrated stock picking capability and can boast a proven long-term track record within the basic materials sector. M&G has managed the Mining & Resources Fund since 2004.

Investment philosophy

M&G carefully conducts a regular review of existing portfolio holdings and the relative position size compared with the index.

Long-term investors by nature, their investment philosophy is to search for companies on attractive valuations relative to peers.

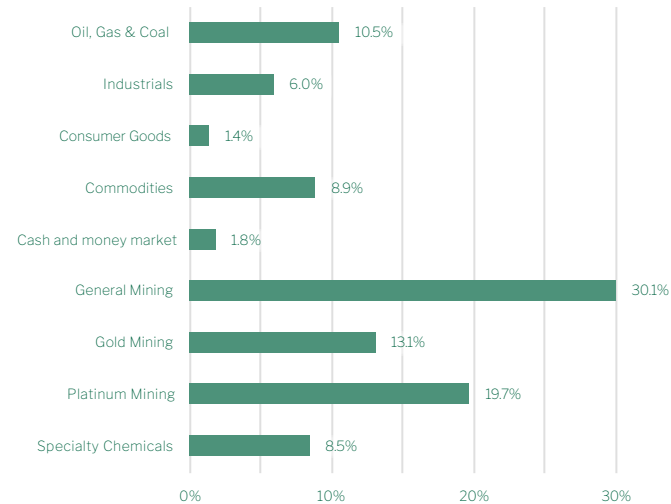

Quantitative analysis identifies potential value and long-run fundamental analysis confirms valuation.

The portfolio is constructed by managing risk exposure relative to the benchmark index.

Definitions

- 1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month. Data source: © Morningstar Inc. All rights reserved.
- 2) Total Expense Ratio (TER), expressed as a percentage of the Fund class, relates to expenses incurred in the administration of the Fund class. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund class, relate to the costs incurred in buying and selling the underlying assets of the Fund class. TC are a necessary cost in administering the Fund class and impact Fund class returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund class, relates to all investment costs of the Fund class. Both the TER and TC of the Fund class are calculated on an annualised basis, beginning 2021-01-01 and ending 2023-12-31. Where the Fund class is less than 3 years old, the TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available.
- 3) The Equity Index referred to under Risk measure is the FTSE/JSE All Share Index (ALSI).
