About the fund manager

Merchant West Holdings (MWH) is one of the largest privately owned financial institutions in South Africa. Merchant West Investments (MWI), formerly known as Counterpoint Asset Management, a subsidiary of MWH, is a multi-strategy asset management business that places the highest priority on the stewardship of clients' assets. The experienced listed property investment team has a deep knowledge of the sector constituents and company management. The investment team at MWI has managed the Nedgroup Investments Property Fund since its inception in 2010.

Investment philosophy

Merchant West Investments' investment process is grounded on rigorous primary research of listed property companies.

They evaluate the management of property companies and their ability to extract value from properties they own.

The focus is on building a portfolio with a high initial yield and inflation-hedged income growth.

Merchant West Investments construct the portfolio to diversify by property type, geography and level of management risk.

Definitions

- 1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month. Data source: © Morningstar Inc. All rights reserved.
- 2) Total Expense Ratio (TER), expressed as a percentage of the Fund class, relates to expenses incurred in the administration of the Fund class. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund class, relate to the costs incurred in buying and selling the underlying assets of the Fund class. TC are a necessary cost in administering the Fund class and impact Fund class returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund class, relates to all investment costs of the Fund class. Both the TER and TC of the Fund class are calculated on an annualised basis, beginning 2020-10-01 and ending 2023-12-31. Where the Fund class is less than 3 years old, the TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available.
- 3) The Equity Index referred to under Risk measure is the FTSE/JSE All Share Index (ALSI).
