#### About the Sub-Investment Manager

The Palomar Fixed Income Team is a boutique fund management team that was established in 2023 to manage the Nedgroup Global Strategic Bond Fund. Co-managed by industry veterans with a proven track record, Alex Ralph and David Roberts, the team focuses on the core of the fixed income market in order to provide stable returns over the longer term. The nimble boutique structure allows for quick decision making and efficient fund management, which alongside the expertise of the team, supports a portfolio that is designed to provide investors with stable fixed income returns.

## Definitions

1) Total Investment Charges (TIC) are the sum of the Ongoing Charges and the Transaction Costs (TC) and are expressed as a percentage of the total fund on an annual, rolling basis.

2) TC relate to the buying and selling costs for the underlying assets of the fund and are a necessary expense in the administration of the fund. Neither the TIC nor the TC should be considered in isolation as all returns may be impacted by other factors over time, including but not limited to market movements, fund type and the decisions of the Investment Manager(s).

3) TIC & TC are calculated on an annual basis but are subject to change subject to any market changes throughout the year which may impact the funds' future TIC. Higher TIC does not necessarily equate a lower return, nor does a lower TIC equate to a better return. The TIC may change, and as such the current TIC may not be an accurate indication of the future TIC.

4) The ongoing charge is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The ongoing charge shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12- month period as at the date shown. The current on-going charge cannot be used as an indication of future ongoing fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

5) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax.

6) Weighted Average Maturity: "Weighted Average Maturity means the weighted average of the remaining life of each instrument held in a portfolio until the principal value is repaid in full, disregarding interest and any discounts. This excludes those securities such as property that don't have a maturity date.

7) Gross Estimated Yield means the sum of all expected income from underlying instruments in the portfolio divided by the cumulative net asset value of the fund. The expected income amounts are approximate and based on market assumptions and forecasts. Actual returns may differ, based on changes in market values, interest rates and changes in costs actually experienced during the investment period.
