Portfolio attributes

Investment objectives

- The portfolio seeks to balance real capital growth and income objectives through a blended allocation to risk assets and income yielding assets.
- Diversification across asset classes helps reduce risk and volatility relative to a general equity portfolio.
- The fund is suitable for investors who require specific exposure to both local and offshore assets, in a balanced manner, as part of their overall investment strategy.

Investment policy

- Our portfolios contain a foundation of quality assets.
- These are complemented by satellite investments that together aim to achieve defined, risk-managed investment outcomes for our clients.
- Equity exposure is limited to a maximum of 75% which helps reduce risk and volatility.
- The fund may also include international exposure on a limited and select basis and may also invest in participatory interests in portfolios of collective investment schemes.

Fund related risks

- Equity and property investments are volatile by nature and subject to potential capital loss.
- Fixed income instruments, including corporate and government bonds, may experience capital loss in the event an issuer defaults on their interest or principal payments.
- The portfolio may be subject to currency fluctuations due to its international exposure.

About the fund manager

Nedbank Private Wealth is predominantly focused on managing South African portfolios. They have a robust, proven investment process with a market-leading track record dating back to 2004. The cornerstones of their investment process are based on valuation, the assessment of quality and taking a long-term view. The team builds concentrated, but diversified portfolios that aim to deliver superior returns over three-to-seven-year periods.

Investment philosophy

Nedbank Private Wealth's investment philosophy is defined as: long-term, well considered.

The process is built on making an assessment of the quality of an investment and paying a fair price by being valuation focused.

They have the patience and discipline to give an investment sufficient time to compound value over the investment horizon.

Nedbank Private Wealth focuses on evaluating earnings growth, dividend growth and the potential change in valuation rating of a business.

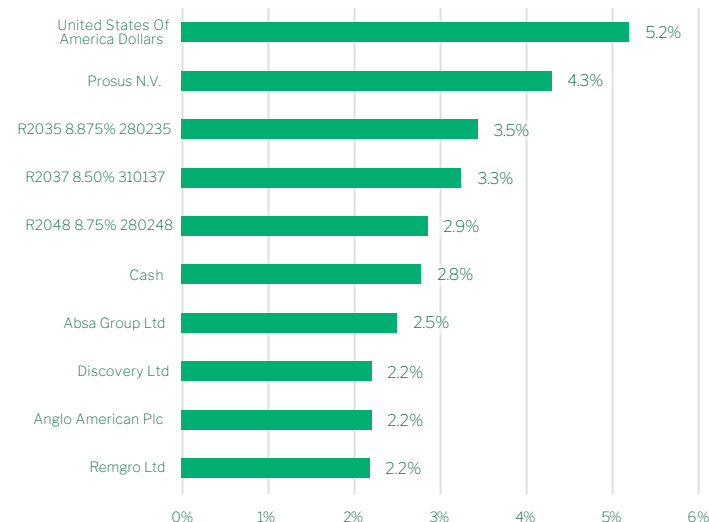

They also have a strong focus on risk management, which is managed by position size and ensuring appropriate diversification.

Definitions

- 1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month. Data source: © Morningstar Inc. All rights reserved.
- 2) Total Expense Ratio (TER), expressed as a percentage of the Fund class, relates to expenses incurred in the administration of the Fund class. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund class, relate to the costs incurred in buying and selling the underlying assets of the Fund class. TC are a necessary cost in administering the Fund class and impact Fund class returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund class, relates to all investment costs of the Fund class. Both the TER and TC of the Fund class are calculated on an annualised basis, beginning 2021-10-01 and ending 2024-09-30. Where the Fund class is less than 3 years old, the TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available.
- 3) The Equity Index referred to under Risk measure is the FTSE/JSE All Share Index (ALSI).

► Disclaimer

Nedgroup Collective Investments (RF) Proprietary Limited is an authorised Collective Investment Scheme Manager and the representative of Nedgroup Investments Funds PLC in terms of the Collective Investment Schemes Control Act 45 of 2002. It is also a member of the Association of Savings & Investment South Africa (ASISA).

The Standard Bank of South Africa Limited is the registered trustee. Contact details: Standard Bank, PO Box 54, Cape Town 8000. Email: Trustee-compliance@standardbank.co.za, Tel: 021 401 2002.

Collective Investments Schemes are generally medium to long term investments. The value of your investment may go down as well as up. Past performance is not necessarily a guide to future performance. Nedgroup Investments does not guarantee the performance of your investment and even if forecasts about the expected future performance are included you will carry the investment and market risk, which includes the possibility of losing capital.

Funds are valued daily at 15:00. Instructions must reach us before 14:00 (12:00 for money market funds) to ensure same day value. Prices are published daily on our website and in selected major newspapers.

Our funds are traded at ruling prices and can engage in borrowing and scrip lending. Some portfolios may hold foreign securities including foreign CIS funds. As a result, the fund may face material risks, which could include, foreign exchange risks, macro-economic risks and potential constraints on liquidity and the repatriation of funds, etc. Nedgroup Investments has the right to close funds to new investors in order to manage it more efficiently.

A schedule of all fees, charges and maximum financial planner fees is available on request.
