Portfolio attributes

Investment objectives

- A portfolio of listed equities primarily through the mining and resource sectors of the market.
- Targeting financially sound companies that participate in mining, mining finance, metals, minerals, energy and other related resources and commodities.
- Offshore exposure will be limited as per South African Reserve Bank regulations.

Investment policy

- Specialist mid and small cap equity fund.
- May invest in listed and unlisted financial instruments.
- May also invest in participatory interests in portfolios of collective investment schemes.

Fund related risks

- Equity investments are volatile by nature and subject to potential capital loss.
- Due to its specialist nature, the portfolio will typically display higher volatility than a general equity portfolio.

About the fund manager

Abax Investments was founded in 2003 and focuses exclusively on investment management. The company is majority owner-managed and all Abax employees are shareholders. They are characterised by a focused team of experienced investment professionals, with deep expertise in SA equity, global equity, fixed interest, derivatives and asset allocation. The investment team at Abax has managed the Entrepreneur Fund since 2004.

Investment philosophy

▶ Abax believe that company earnings and dividend growth are the primary drivers of share price appreciation.

▶ Extensive research enables Abax to identify a concentrated core of companies offering high growth at attractive valuations.

▶ Abax construct the portfolio on the investment merit of companies and their level of conviction.

▶ Global and local macro-economic and industry views inform their share selection and portfolio construction.

Definitions

- 1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month. Data source: © Morningstar Inc. All rights reserved.
- 2) Total Expense Ratio (TER), expressed as a percentage of the Fund class, relates to expenses incurred in the administration of the Fund class. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund class, relate to the costs incurred in buying and selling the underlying assets of the Fund class. TC are a necessary cost in administering the Fund class and impact Fund class returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund class, relates to all investment costs of the Fund class. Both the TER and TC of the Fund class are calculated on an annualised basis, beginning 2021-10-01 and ending 2024-09-30. Where the Fund class is less than 3 years old, the TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available.
- 3) The Equity Index referred to under Risk measure is the FTSE/JSE All Share Index (ALSI).

► Disclaimer

Nedgroup Collective Investments (RF) Proprietary Limited is an authorised Collective Investment Scheme Manger and the representative of Nedgroup Investments Funds PLC in terms of the Collective Investment Schemes Control Act 45 of 2002. It is also a member of the Association of Savings & Investment South Africa (ASISA).
