## Portfolio attributes

### Investment objectives

The Sub-Fund aims to provide investors with a return above cash with volatility below that of equities. This Sub-Fund will aim to generate a return above the US Dollar one month SOFR (Secured Overnight Financing Rate), measured over a rolling three year period.

### Investment policy

- The Sub-Fund will employ an active management approach and will invest in a global portfolio of cash, fixed income and equity.
- Maximum equity allocation of 40%.
- Fixed income exposure will be primarily focused on developed market government issued bonds.
- Maximum exposure to non-USD currency allocation of 45%.
- Foreign exchange hedging derivative instruments may be used to manage currency exposure.
- Adheres to article 6 of SFDR classification.

### Fund related risks

- Due to fluctuations of the market, and performance of individual companies, equity risk can impact funds.
- Changes in currency exchange rates may have an impact on the value of the fund.
- While derivatives may be used to offset potential risk, there is no guarantee of them providing the anticipated protection.
- Credit risks include, but are not limited to, issuers defaulting or having their credit rating downgraded which devalues the bonds they issue.
- For full details of risks, please refer to the risk section in the Prospectus and KIID.

## ► Definitions

- 1) Total Investment Charges (TIC) are the sum of the Ongoing Charges and the Transaction Costs (TC) and are expressed as a percentage of the total fund on an annual, rolling basis.
- 2) TC relate to the buying and selling costs for the underlying assets of the fund and are a necessary expense in the administration of the fund. Neither the TIC nor the TC should be considered in isolation as all returns may be impacted by other factors over time, including but not limited to market movements, fund type and the decisions of the Investment Manager(s).
- 3) TIC & TC are calculated on an annual basis but are subject to change subject to any market changes throughout the year which may impact the funds' future TIC. Higher TIC does not necessarily equate a lower return, nor does a lower TIC equate to a better return. The TIC may change, and as such the current TIC may not be an accurate indication of the future TIC.
- 4) The ongoing charge is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The ongoing charge shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12- month period as at the date shown. The current on-going charge cannot be used as an indication of future ongoing fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.
- 5) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax.
- 6) Weighted Average Maturity: "Weighted Average Maturity means the weighted average of the remaining life of each instrument held in a portfolio until the principal value is repaid in full, disregarding interest and any discounts. This excludes those securities such as property that don't have a maturity date.
- 7) Gross Estimated Yield means the sum of all expected income from underlying instruments in the portfolio divided by the cumulative net asset value of the fund. The expected income amounts are approximate and based on market assumptions and forecasts. Actual returns may differ, based on changes in market values, interest rates and changes in costs actually experienced during the investment period.
