The Central Bank of Ireland is responsible for supervising Nedgroup Investments (IOM) Limited in relation to this Key Information Document. This PRIIP is authorised in Ireland. Carne Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The key information document is accurate as at 1 June 2023.

➤ What is this product?

Type: This product is an open-ended umbrella investment company.

Term: No fixed term.

Objectives: In order to pursue its objective the Sub-Fund will employ an active management approach and will primarily invest in units of real estate investment trusts (REITs) and property related equity securities issued by companies (both the REITs and companies hereinafter referred to as issuers) listed on exchanges globally. Those issuers acquire and hold property from around the world including, office buildings, shopping centres, industrial warehouses, residential communities, hotels, self-storage and healthcare facilities and derive most of their returns from rental income from these property types. The Sub-Fund may also invest in issuers that derive fees from other real estate activities such as real estate construction or development or those that earn fees through providing contracting or management activities or services in the real estate sector. The Sub-Investment Manager is Resolution Capital Limited.

The Fund seeks to promote environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulations.

Intended retail investor: Investment in the Sub-Fund is suitable for investors seeking a moderate degree of growth with moderate levels of risk and volatility over the medium to longer term.

Depository: The Fund's assets are held through its depository, which is Citi Depository Services Ireland Designated Activity Company.

Distribution type: The product is accumulating.

➤ What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Fund's Prospectus available at www.nedgroupinvestments.com.

The Sub-Fund does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average and best performance of the product/benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Example investment: \$ 10,000		1 year	5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress Scenario	What you might get back after costs	\$ 1,330	\$ 1,450
	Average return each year	-86.70%	-32.04%
Unfavourable Scenario ¹	What you might get back after costs	\$ 7,160	\$ 7,360
	Average return each year	-28.36%	-5.95%
Moderate Scenario ²	What you might get back after costs	\$ 9,670	\$ 10,470
	Average return each year	-3.29%	0.92%
Favourable Scenario ³	What you might get back after costs	\$ 12,710	\$ 15,290
	Average return each year	27.06%	8.86%

¹ This type of scenario occurred for an investment from 12/2021 to 04/2023

² This type of scenario occurred for an investment from 03/2018 to 03/2023

³ This type of scenario occurred for an investment from 12/2016 to 12/2021

➤ What happens if Nedgroup Investments (IOM) Limited is unable to pay out?

You may face a financial loss should the manufacturer or the Depository, default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

➤ What are the costs?

Cost over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

Example investment: \$ 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	\$ 441	\$ 1,109
Annual cost impact(*)	4.41%	2.05%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.98% before costs and 0.92% after costs.

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

The table shows the impact on return per year		If you exit after 1 year	
One-off costs upon entry or exit	Entry costs	3.00% of the amount you pay in when entering this investment.	\$ 300
	Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	\$ 0
Ongoing costs taken each year	Management fees and other administrative or operating costs	1.11% of the value of your investment per year. This is an estimate based on actual costs over the last year.	\$ 111
	Transaction costs	0.29% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	\$ 28.51
Incidental costs taken under specific conditions	Performance fees and carried interest	There is no performance fee for this product.	\$ 0

➤ How long should I hold it and can I take my money out early?

The recommended minimum holding period: 5 years.

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years. You may sell your shares in the product, without penalty, on any day on which the banks are normally open for business in Ireland and the Isle of Man.

You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the sub-fund on any business day (as set out in the Fund's prospectus).

If you cash in at an early stage this will increase the risk of lower investment returns or a loss.

➤ How can I complain?

If you wish to make a complaint, you should in the first instance do so either orally or in written format. Please direct complaints to any of the following:
