1.9% 3 years

4.3% LT ave

Exchange rates (Rand spot rate and quarterly change)

US DOLLAR R17.86

Emerging Market currencies fell on worries about how their economies will cope with economic challenges, with the Rand further impacted by the Moody's downgrade of South Africa's credit rating to junk status.

16%

BRITISH POUND R22.15

In line with the UK equity market, the pound sterling performed poorly this quarter when compared to other developed market currencies. The pound lost 3% to the US dollar in February and almost 7% in March.

EURO

R19.60

The Euro and Europe ex-UK equity market performed in line with the pound and the UK equity market, and also ended the quarter as one of the weakest developed market regions.

Domestic performance drivers

HIGHLIGHTS

- The State of the Nation sought to highlight the areas where implementation (rather than pledges) was underway, including in critical areas such as energy reforms and youth unemployment.
- Finance Minister Tito Mboweni presented a reasonable Budget on the 26th of February that even delivered some positive surprises.
- President Ramaphosa acted with comprehensive and decisive measures, calling for a unified response to protect the country, its people and healthcare system. On 26 March, the country entered a 21-day lockdown with only essential services allowed.

LOW POINTS

- We started the year with electricity shortages continuing to plague the country. Eskom CEO Andre de Ruyter, informed South Africa that the power system will remain vulnerable to load shedding for at least 18 months to allow much needed maintenance work.
- Moody's cut South Africa's sovereign credit rating to Ba1 From Baa and the outlook remains negative. South Africa now has a sub-investment grade rating from all three major rating agencies and will fall out of the FTSE World Government Bond index.

Global performance drivers

HIGHLIGHTS

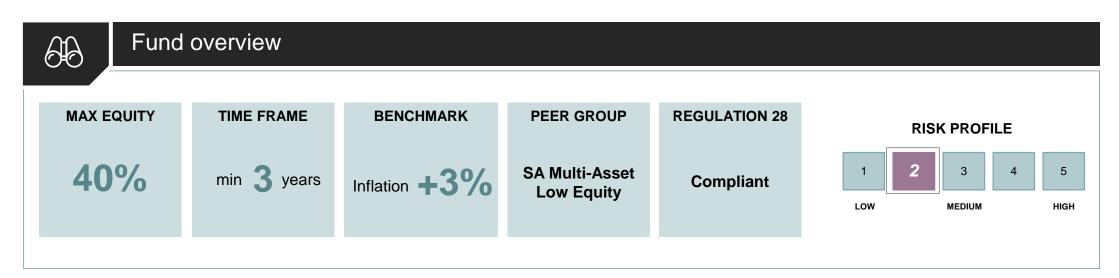

- Phase One of the US China Trade Deal was signed in January, which
 provides something of a truce, and may pave the way towards further deescalation as the negotiators move on to the next stage.
- The UK finally legally departed from the EU on the 31st of January. Although little else changed, the UK and EU have now entered an eleven month transition
- With the benefit of experience gained in the 2008/9 financial crisis, policy makers reacted quickly to the growing Coronavirus-crisis, announcing massive monetary and fiscal stimulus packages.

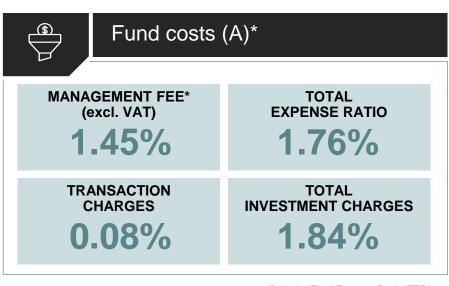

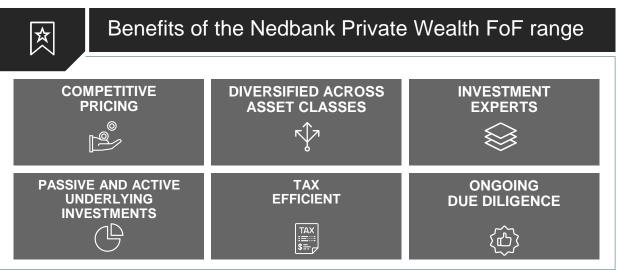

LOW POINTS

- In early March, the World Health Organisation declared the COVID-19 outbreak a global pandemic. By the end of March, much of the world was in lockdown.
- A second factor that added to market pressures was the collapse in the oil
 price which resulted from the breakdown of the OPEC+ talks. The oil price
 now trades in the low-to-mid US\$20s per barrel. If this level of pricing is
 sustained, much of the North American oil industry will suffer significant
 losses, and probably be driven to bankruptcy.

DEFENSIVE FUND OF FUNDS | 31 MARCH 2020

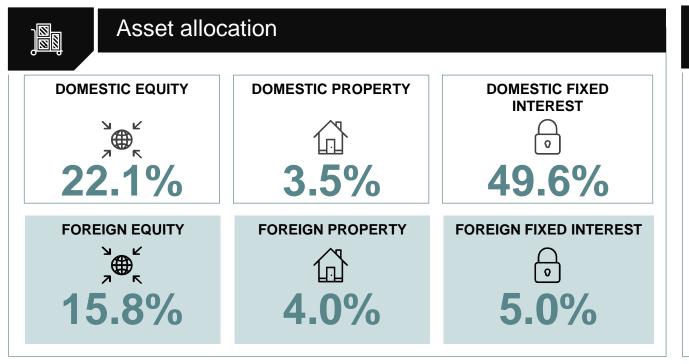

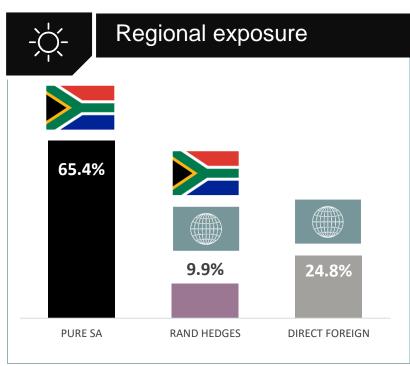

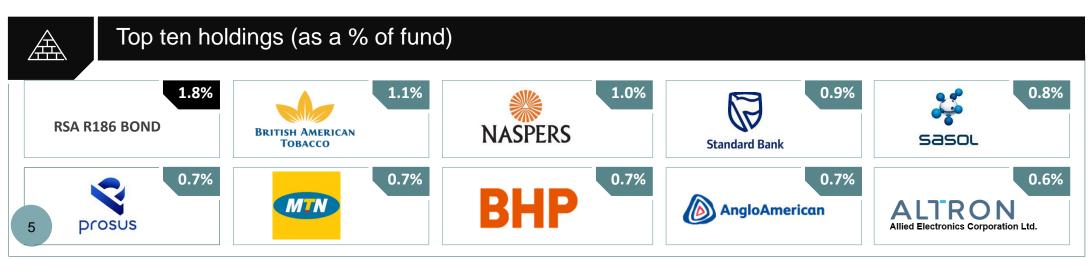

*Includes BOTH multi-manager and underlying fund fees. *Both the Total Expense Ratio (TER) and Transaction Costs (TC) of the Fund are calculated on an annualised basis, beginning 1 Jan 2017 and ending 31 Dec 2019.

DEFENSIVE FUND OF FUNDS | 31 MARCH 2020

Domestic asset class positioning

DOMESTIC EQUITY

22.1%

- Pockets of opportunity have opened up in the market, but are not without risks.
- Broadly balanced: rand-hedge exposure exists, with meaningful tilt to domesticfacing companies.

DOMESTIC BOND

DOMESTIC PROPERTY

3.5%

- Despite very attractive yields, the local economic backdrop is not supportive
- Within the active component, we remain invested in small/mid-sized domestically focused firms; with limited SAPY heavyweights present.

28.8%

- Real yields are offering good value and we have increased our exposure.
- Playing the interest rate cycle through our duration positioning given increased volatility.

DOMESTIC CASH

20.8%

- The exposure to defensive assets remains prudent given the geopolitical risks that still exist.
- · Provides consistent return profile.
- The healthy cash balance also provides optionality (dry powder) should opportunities arise.

Global asset class positioning

GLOBAL EQUITY

15.8%

- Pockets of opportunity have opened up in the market, but are not without risks.
- International opportunities offering diversification, access to higher growth (e.g. EM) and risk adjusted returns, not just protection against rand weakness

GLOBAL PROPERTY

4.0%

- Overweight commercial property companies focused on offices and data centres, but underweight those specialising in residential and retail.
- Also positioned for concerns around the impact of technology disruption.

GLOBAL BOND

2.2%

 Underweight global bonds in general.
 Global government bond yields declined on concerns that global growth is now decelerating.

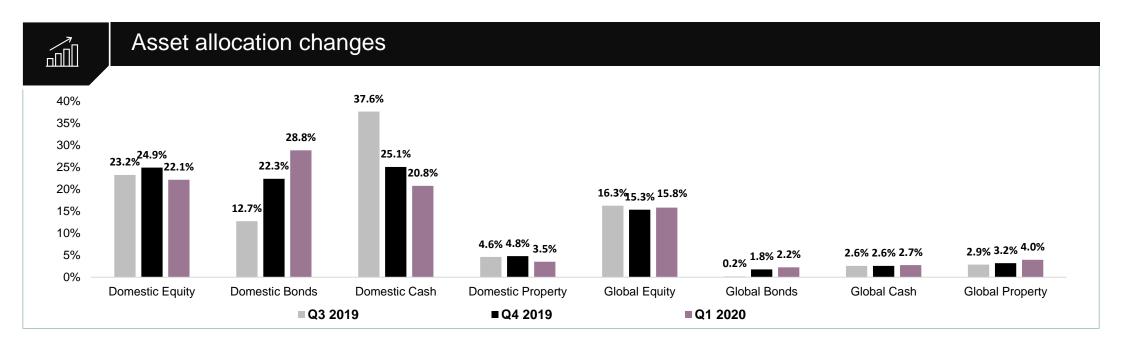

GLOBAL CASH

2.7%

 Cash positions remain as the underlying managers look for compelling, idiosyncratic opportunities.

NEDGROUP INVESTMENTS PRIVATE WEALTHDEFENSIVE FUND OF FUNDS | 31 MARCH 2020

Summary of recent changes

- The **foreign equity** exposure was reduced to the tactical (overweight) position when it breached materially in order to lock in currency gains and reduce exposure to the risk of rand strength. The **domestic bond** exposure was increased to overweight, as the Moody's downgrade along with COVID-19 weakness created great buying opportunity. The **domestic equity** exposure was marginally increased at the end of the quarter and we are looking to increase exposure in a phased in approach to neutral. **Domestic cash** was used as a balancing item.
- A healthy allocation to defensive assets remain. The funds are well diversified across all asset classes, with a moderate risk positioning.

Fund Contributors and Detractors – Q1 2020

CONTRIBUTORS THIS QUARTER

- Conservative positioning of the Nedgroup Investments
 Core Income fund in terms of both credit and liquidity
 (99% across Big 5 banks), as well as the elevated cash of most of the underlying managers offered a buffer;
- The rand was the largest contributor to performance as it weakened by 22% to the US dollar in Q1'20. The fund's overweight allocation to direct offshore exposure, as well as the underlying equity managers' bias to rand hedges benefited from this;
- Defensive rand hedges Naspers (+12% in Q1'20), Prosus (+17%) and British American Tobacco (+2%) are commonly held by our domestic equity managers and offered some protection against the widespread weakness caused by the outbreak of the Coronavirus.

DETRACTORS THIS QUARTER

- SA Financials was the worst performing sector of the domestic equity market. Some of the widely held positions are Standard Bank (-39% in Q1'20), Santam (-5%), FirstRand (-36%) and RMB Holdings (-39%);
- Concerns about the health of Sasol's (-88%) balance sheet spiked when the oil price imploded on the back of a disjointed OPEC and the subsequent Russia-Saudi Arabia price war;
- The change in yield on the SA 10-year government bond has been unprecedented, increasing from 8.23% at the start of the quarter to 10.96% at market close on 31st March. This movement has impacted credit instruments across the market, with the All Share Bond Index falling by 8.7%, and adversely impacting the fund's bond and multiasset income allocations.

DISCLAIMER

Nedgroup Collective Investments (RF) Proprietary Limited is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust portfolios. Unit trusts are generally medium to long term investments. The value of your investment may go down as well as up. Past performance is not necessarily a guide to future performance. Nedgroup Investments does not guarantee the performance of your investment and even if forecasts about the expected future performance are included you will carry the investment and market risk, which includes the possibility of losing capital. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. Certain unit trust funds may be subject to currency fluctuations due to its international exposure. Nedgroup Investments has the right to close unit trust funds to new investors in order to manage it more efficiently. A schedule of fees and charges and details of our awards are available on request from Nedgroup Investments. A fund of funds may only invest in other unit trust funds, that levy their own charges, which could result in a higher fee structure. Nedgroup Investment Advisors (Pty) Ltd (the 'Investment Manager') an authorised as a financial services provider under the Financial Advisory and Intermediary Services Act (FSP No. 1652), is the appointed Investment Manager of the Management Company.

Certain Nedgroup Investments unit trust portfolios include international assets, whereby a change in the exchange rates may cause the value of those investments to rise and fall. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and that in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed.

Please note that Nedgroup Collective Investments (RF) Proprietary Limited is not authorised to and does not provide financial advice.
