4.2% 3 years

4.6% LT average

US and EU yields ended the quarter unchanged. UK struggled amidst expected monetary policy tightening

US Cash

0.0%

Q3 2021

0.2% 1 year

1.3% 3 years

4.3% LT average

Global central banks turned hawkish in September, with the Fed providing indicative timelines for tapering

Exchange rates (Rand spot rate and quarterly change)

US Dollar R15.05

5%

The rand had a tough end to the quarter, giving back all of the gains made this year relative to the US dollar, as global investor sentiment turned. The US economy continued on a strong recovery path, despite the ongoing threat of rising inflation and Covid-19 infections, helping the US dollar to remain strong.

British Pound R20.29

3%

The British pound was the worst performer of the developed market currencies as UK's inflation reached its highest point ever in August, at 3.2%. Despite the economy expanding for a sixth consecutive month, the pace of the recovery was slower in July.

Euro R17.44

3%

Supply chain bottlenecks and rising energy prices (due to low gas supply and lack of summer wind) raised concerns around rising inflation. Germany held a general election in which Social Democrats (SPD) took the largest share of the votes. Coalition talks to form a new government are now under way.

Quarterly report: Nedgroup Investments

Domestic performance drivers

Highlights

- President Ramaphosa announced a cabinet reshuffle in August, which included changes to the security cluster and a new health minister, following the resignation of Zwele Mkhize. Most influential for markets was the appointment of Enoch Godongwana as finance minister.
- The economy recorded quarterly GDP growth of 1,2% (not annualised), exceeding market expectations yet again.
- On the last day of the month, South Africa moved to adjusted alert level 1, further relaxing restrictions on movement and trade. This, combined with the removal of South Africa from various countries' "red lists" may provide some much-needed support for the country's economic recovery.

Low points

- The civil unrest in July 2021 left a significant dent in the economy, notably in the property sector. Several shopping centres, industrial properties (warehouses and storage facilities) and educational facilities, located primarily in Kwazulu-Natal and Gauteng, experienced significant trading interruptions due to looting and civil unrest.
- South Africa's daily covid-19 vaccination rate continues to fall short of the target of 300 000 daily doses with September's low point at 159,542 and August's at 147,307. Less than 25% of South Africa's adult population of approx. 40 million is fully vaccinated. South Africa needs to reach approximately 18 million more adults to reach the 70% coverage target.

Global performance drivers

Highlights

- The Delta variant of Covid-19 continued to spread, but most large eurozone countries have now fully vaccinated around 75% of their population against the virus, enabling many restrictions on travel and other activities to be lifted.
- Overall, net energy exporters outperformed this quarter, most notably Colombia, Russia, Kuwait, Saudi Arabia, Qatar and the UAE.
- India was the best-performing index market index during the quarter and achieved a strongly positive performance as accommodative monetary policy and the easing of Covid-19 restrictions boosted investor sentiment.

Low points

- With inflation pressure mounting in the United Kingdom, policymakers may be forced to raise interest rates as early as 2022. The economy is yet to fully recover from the pandemic.
- The potential failure of Evergrande Group (one of China's largest property developers with a \$300bn debt burden) sparked fears of global contagion. The commodity market was adversely impacted, especially precious and other industrial metals. Consequently, it was one of the worst quarters for emerging markets since the start of the pandemic.

Ninety One Equity	1,2%	17,3%	-9,2%	11,4%	6,3%	14.6%
Nedgroup Investments Rainmaker (Abax)	-1,5%	17,2%	-12,2%	7,4%	0,0%	11,9%
Nedgroup Investments SA Equity (Laurium)	-4,1%	12,0%	-12,8%	4,1%	-6,9%	11.5%

Positive contributors this quarter

- The fund's direct offshore exposure and SA listed rand hedges benefitted from this quarter's weakening of the rand/dollar exchange rate from R14.28 to R15.05 (5%).
- Standard Bank was one of the largest contributors as it recovered from oversold levels. Despite the recovery, the underlying fund managers continue to see value in the domestic banking sector in general.
- Aspen delivered strong returns for the quarter (+69%). With its elevated debt now firmly under control, the focus shifted to its vaccine manufacturing capability. Aspen stands to benefit from the increased production of Covid vaccines. Should it successfully negotiate an agreement with Johnson & Johnson to produce its vaccine on a first party basis, rather than as a contract manufacturer, this will add material upside.

Detractors this quarter

- Global equity exposure (excluding currency movement) detracted during the quarter, given a slower than anticipated recovery in some markets and exposure to China and its wide-ranging regulatory interventions.
- Local listing Naspers was also a large detractor, as the Chinese Technology regulator clamped down on tech businesses, severely impacting the share-prices of Chinese tech companies. More specifically for Tencent, government attempts to protect minors means increasing restrictions on time spent gaming.
- Iron ore and PGMs commodity spot prices came under pressure this quarter, putting pressure on the likes of Impala Platinum (-23%). Iron ore prices came under pressure as Chinese authorities sought to cap domestic steel production. The continued global semi-conductor shortage has impacted automotive production and PGM demand.

As at 30 September 2021

Allan Gray was introduced on the 1st of October 2018 and subsequently switched for Satrix ALSI Trakcer at the end of December 2020.

The Nedgroup Investments Value fund merged with Nedgroup Investments SA Equity 4th June 2021, managed by Laurium Capital.

Disclaimer

Nedgroup Collective Investments (RF) Proprietary Limited is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust portfolios. Unit trusts are generally medium to long term investments. The value of your investment may go down as well as up. Past performance is not necessarily a guide to future performance. Nedgroup Investments does not guarantee the performance of your investment and even if forecasts about the expected future performance are included you will carry the investment and market risk, which includes the possibility of losing capital. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. Certain unit trust funds may be subject to currency fluctuations due to its international exposure. Nedgroup Investments has the right to close unit trust funds to new investors in order to manage it more efficiently. A schedule of fees and charges and details of our awards are available on request from Nedgroup Investments. A fund of funds may only invest in other unit trust funds, that levy their own charges, which could result in a higher fee structure. Nedgroup Investment Advisors (Pty) Ltd (the 'Investment Manager') an authorised as a financial services provider under the Financial Advisory and Intermediary Services Act (FSP No. 1652), is the appointed Investment Manager of the Management Company.

Certain Nedgroup Investments unit trust portfolios include international assets, whereby a change in the exchange rates may cause the value of those investments to rise and fall. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and that in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed.
