

Quarterly review

Nedgroup Investments Core Global Feeder Fund

As at 30 June 2025

Markets Rebound Amid Trade and Geopolitical Turmoil

The second quarter of 2025 unfolded under a cloud of heightened geopolitical tension and economic uncertainty, testing the resilience of global markets and policymakers alike. A dramatic shift in U.S. trade policy, escalating conflict in the Middle East, and diverging central bank strategies all contributed to a volatile yet ultimately resilient financial landscape. Over the quarter, the Nedgroup Investments Core Global Feeder Fund increased by 4.5%.

The table below compares an investment in Nedgroup Investments Core Global Feeder Fund to US bank deposits (cash) investment over various time periods. For every R10 000 invested in the Nedgroup Investments Core Global Feeder Fund at inception (4 January 2016), you would have R23 078 at the 30th of June 2025. This is much higher than the R14 126 you would have achieved had you invested your money in US bank deposits (cash) over the same period.

	Value of R10,000 investment in Nedgroup Investments Core Global Feeder Fund versus US Cash ¹					
	3 Months	1 Year	3 Years	5 Years	7 Years	Inception 4 January 2016
Growth of fund (after fees) (Growth in %)	R10 447 4.5%	R11 029 10.3%	R15 187 14.9% p.a.	R15 949 9.8% p.a.	R21 301 11.4% p.a.	R23 078 9.2% p.a.
Growth of US Cash (Growth in %)	R9 765 -2.4%	R10 191 1.9%	R12 445 7.6% p.a.	R11 779 3.3% p.a.	R15 565 6.5% p.a.	R14 126 3.7% p.a.
Growth target (Global MA High Equity Mean) (Growth in %)	R10 506 5.1%	R11 156 11.6%	R14 566 13.4% p.a.	R14 801 8.2% p.a.	R18 737 9.4% p.a.	R19 827 7.5% p.a.

Fund Return versus US Cash¹ in Rand from inception ending 30 June 2025

Since the inception of the Nedgroup Investments Core Global Feeder Fund it has done better than US cash. However, it is to be expected that occasionally there will be periods where the fund does not beat US cash over 5 years. Over the long term², a portfolio such as Nedgroup Investments Core Global Feeder Fund would have delivered a higher return than US cash around 86% of the time over any 5-year period.

1. We used the ICE Bank of America 3-month deposit rate for US cash returns converted into Rands
2. Based on Global market returns from 1997 to 2018 (source Morningstar) using the same long-term equity allocation and fees.

Economic and market review

In a move that stunned global markets, President Donald Trump declared a sweeping overhaul of U.S. trade policy in what he dubbed “Liberation Day.” Far from symbolic, the announcement introduced a broad set of tariffs that marked the most aggressive turn toward protectionism in nearly a century. The average U.S. import tariff surged from 2.5% to 24%, with most nations facing a flat 10% levy and strategic rivals hit even harder.

Markets reacted swiftly. Major indices tumbled on fears of a deepening trade war, slower global growth, and rising inflation. The scale and abruptness of the tariff regime sent shockwaves through supply chains and diplomatic circles alike. The global response remains a critical variable. China and the European Union, among others, hold significant leverage—ranging from retaliatory tariffs to control over rare earth minerals vital to high-tech industries. Currency dynamics will also play a role: a stronger dollar could cushion inflationary effects, while tit-for-tat measures risk amplifying economic disruption.

Despite the turbulence, equity markets staged a remarkable comeback. The S&P 500 notched a record high by the end of June, fully recovering from an 18.8% drawdown in April. Global equities followed suit, with the MSCI All Country World Index climbing 11.7% for the quarter. Emerging markets led the charge, outperforming developed peers with a 12.2% gain.

This rebound was fuelled in part by easing geopolitical tensions. A brief but intense 12-day conflict between Israel and Iran in mid-June sent oil prices soaring above \$80 per barrel. However, a U.S.-brokered ceasefire helped stabilize the region, and crude prices eventually settled back to \$67. Adding to the optimism was a tentative trade agreement between Washington and Beijing. The proposed deal would grant the U.S. access to critical rare earth elements, while easing restrictions on certain Chinese imports—a potential thaw in an otherwise frosty relationship.

Monetary policy responses varied across regions. The European Central Bank continued its easing trajectory, cutting interest rates by 25 basis points in June—its eighth reduction in a year, totalling a 2% decline since mid-2024. The move reflects easing inflation and a cautiously improving economic outlook. In contrast, the Bank of England held rates steady at 4.25%, signalling a wait-and-see approach. Meanwhile, the People’s Bank of China paused after a May rate cut, part of a broader effort to support a slowing economy amid trade headwinds.

Bond markets remained volatile, buffeted by geopolitical developments and concerns over U.S. fiscal health. A pending budget reconciliation bill raised alarms about long-term debt sustainability, keeping pressure on long-term yields. The Bloomberg Global Aggregate Bond Index still managed a 4.5% return for the quarter.

The U.S. dollar weakened notably, falling 7% against a basket of major currencies. Investor sentiment has been rattled by the Trump administration’s aggressive policy shifts, and currency markets are adjusting accordingly.

As the world enters the second half of 2025, the outlook remains uncertain. Much will depend on how global powers navigate the new trade landscape, whether diplomatic efforts can prevent further conflict, and how central banks balance growth and inflation risks. For now, markets have proven surprisingly resilient—but the road ahead is anything but smooth.

Disclaimer

Nedgroup Collective Investments (RF) Proprietary Limited is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust portfolios. Unit trusts are generally medium to long term investments. The value of your investment may go down as well as up. Past performance is not necessarily a guide to future performance. Nedgroup Investments does not guarantee the performance of your investment and even if forecasts about the expected future performance are included you will carry the investment and market risk, which includes the possibility of losing capital. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. Certain unit trust funds may be subject to currency fluctuations due to its international exposure. Nedgroup Investments has the right to close unit trust funds to new investors in order to manage it more efficiently. A schedule of fees and charges and details of our awards are available on request from Nedgroup Investments. A fund of funds may only invest in other unit trust funds, that levy their own charges, which could result in a higher fee structure. Nedgroup Investment Advisors (Pty) Ltd (the 'Investment Manager') an authorised as a financial services provider under the Financial Advisory and Intermediary Services Act (FSP No. 1652), is the appointed Investment Manager of the Management Company.

Certain Nedgroup Investments unit trust portfolios include international assets, whereby a change in the exchange rates may cause the value of those investments to rise and fall. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and that in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed.
