1) The on-going fee is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The on-going fee shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12-month period as at the date shown. The current on-going fee cannot be used as an indication of future on-going fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

Funds are generally medium to long-term investments. The value of your investment may go down as well as up. International investments may be subject to currency fluctuations due to exchange rate movements. Past performance is not necessarily a guide to future performance. Nedgroup Investments does not guarantee the performance of your investment and even if forecasts about the expected future performance are included you will carry the investment and market risk, which includes the possibility of losing capital.
